► Mobile Lifter for feeding of blister lines and heat sealing machines

A flexible and fast product changeover is especially required when it comes to blister lines with frequent format change.

Challenged by this request, the mobile lifter from SERVOLIFT has been designed. It allows efficient format changeover of blisters foil reels and modules.

The multifunctional unit allows precise positioning at the foil reel support, as well as simple exchange of modules by use of the extendable arbor.

Sideways positioning at the packaging line for exchange of the foil reel

Exchange of modules/tools at a packaging line

Overall weight of machine:	1200kg
Max. lifting height:	approx. 1800mm
Max. load capacity:	400kg
Max. lateral overhang:	1200mm
